

NEW METROPOLITAN PERSPECTIVES 2022

FOCUS SESSIONS - FS

FS-RH

II EDITION RHEGION UNITED NATIONS 2030: TOWARDS A NEW SPACE'S ORMA, OPPORTUNITY AND RISKS OF NEW MODALITIES OF ANTHROPIZATION BETWEEN SUSTAINABILITY, INNOVATION AND FRAGILITY FOR THE TERRITORY

Keywords: Ecological Approach; Sustainable Development Scenarios; Integrated Territorial & Town Planning.

Even before pandemic cities shown thermodynamic limits, great social and contradictions (Harvey, 1993, 2012) and of meaning less (Augè, 1992, 1999): results of uncontrolled globalization (Rodrik, 2011) and of an unsustainable artificialization (Munafò, 2020). To respond to economic, environmental and health crises, with resilience as key element for environmental and social antifragility ((Rifkin, 2019; Taleb, 2012), the Event intends to face new paths of reterritorialization (Raffenstein, 1987). So participating in developing a robust theoretical and methodological framework inspired by the autopoiesis (Maturana and Varela, 1987) and ecopolitics (Morin, 1985, 2020), cultured technology (Del Nord, 1991; Zeleny, 1985), to go beyond the paradigm of the modern city, based on the goals' partnership required by the UN 2030 Agenda (2015). That is the transition from process control to product control (Nilles, 1988) together with the possible breaking of the synchrony between spaces and times, the foundations of the Informational city (Castells, 1989, 1996, 1997; Beguinot, 1989; Aragona, 1993), opens to new opportunities for the territory (Faggian, 2020; Torre, 2020). So contributing to the elimination of land consumption and to the protection of biodiversity (EU, 2019, 2020), developing operational paths to implement the Glocal (Robertson, 1995), between internal and central areas, based on the circular economy, combining innovation and environment.

CHAIRS

Stefano Aragona (Coordinator) - Dep. Pau, University Mediterranea of Reggio Calabria

Eng., Ph.D., Researcher in Town Planning, Master of Science in Economy & Policy Planning, Delegate of the University Mediterranea of Reggio Calabria at the Universities for the Sustainable Development Network – RUS.

Gabriella Pultrone - Dep. Darte, University Mediterranea of Reggio Calabria

Architect, PhD in "Planning and Design of the Mediterranean City". Assistant Professor in Urban Planning - Mediterranean University of Reggio Calabria. Member of the University Quality Committee (PQA).

Francesca Assennato - Geological Survey of Italy, Institute for environmental protection and research (ISPRA)

PhD in Energy and environment. Head of Land Monitoring Unit. Geological Survey of Italy - ISPRA (Italian Institute for Environmental Protection and Research). Responsible for ISPRA in relevant EU funded projects (H2020 EJP SOIL, Nellife4drylands). Main topics: land monitoring, impacts of urbanization, land degradation and desertification, ecosystem services, land use planning, urban regeneration.

Sandro Fabbro - Polytechnic Department of Engineering and Architecture (DPIA), University of Udine

Graduated in Urban Planning at the University Institute of Architecture in Venice, PhD (1993), currently is associate professor. Scientific director of international and national research projects, he has almost 200 registered research products.

Fabiola Fratini - Faculty of Engineering "Sapienza" Rome University, DICEA

Fabiola Fratini, architect, PhD, professor of Urban Planning at the Faculty of Engineering "Sapienza" Rome University, DICEA. The main research field developed is sustainable urban regeneration. On this topic from 2015 she experimented methodologies and tools to support citizen empowerment and to release small actions for long-term strategies in the neighbourhood of San Lorenzo (Rome). She is author of papers on this subject: "Oasi Verdi a San Lorenzo (Roma) La rigenerazione a piccoli passi", CRIOS 19/2020, pp.48-61, Franco Angeli, ISSN 2279-8986; "Rigenerazione tra sostenibilità, citizen empowerment e agopuntura urbana", BDC- Bollettino del Centro Calza Bini, numero 1 -2020, pp.91-116, ISSN 1121-2918; "Dal Green Network al bosco temporaneo. Prove di rigenerazione sostenibile nel quartiere di San Lorenzo a Roma", PALLADIO – Rivista di Storia dell'Architettura e Restauro, nn. 63-64 2019, pp. 71-78, ISSN: 0031-0379

Francesca Silvia Rota - CNR IRCrES

Researcher at CNR IRCrES. She holds a Ph.D. in Territorial Planning and Local Development. Her research interests include local development, competitiveness, sustainability and resilience.

Paolo Salonia - Director of Research associate of Institute Sciences Cultural Heritage – ISPC CNR, ICOMOS IT Advisor and Executive Board Member, Roma

Architect, former Director of the Institute for Technologies Applied to Cultural Heritage of the National Research Council, with more than forty-five years of research experience in the field of knowledge for the preservation and enhancement Cultural Heritage. Currently he is Research Director Associate at the ISPC-CNR and ICOMOS IT Advisor and Executive board member.
