

NEW METROPOLITAN PERSPECTIVES 2022

FOCUS SESSIONS - FS

FS-RH02

THE ECOLOGICAL TRANSITION INTO THE EXISTING: CHALLENGES FOR THE ANCIENT AND MODERN HERITAGE

Keywords: Ancient Heritage; Modern Heritage; Conservation/Transformation.

The ecological transition is not the „reformed“ industrial city but the initiation of a structural transformation of human settlements, both historical and more recent. The implications of this transformation are manifold. They are spatial and functional transformations, they concern the life of the inhabitants, they involve the use of territories, buildings, ancient testimonies or the modern era. They have different weight and relief in relation to the scales and dimensions where they are present.

The session faces with the great challenge between maintaining the memory of history and the needs related to social and environmental sustainability, being aware of the limits and potential contradictions between the first and second issues.
