THEMATIC SESSIONS - TS

TS-34

ACCESSIBILITY AND DESIGN FOR ALL

Keywords: Universal Design; Inclusive Environments; Accessibility Standards; Diverse Abilities; Usability.

Since they promote an inclusive society where people with varying abilities can actively participate in various aspects of life, accessibility and design for all are essential. Prioritizing universal design principles helps to improve the quality of life for a wide range of individuals by ensuring that products, places, and digital interfaces are not just compliant with standards but also useable.

Renowned experts in the domain will look into creative design approaches that satisfy accessibility requirements while also capturing the spirit of universal design. Expected revelations encompass the dynamic terrain of assistive technology and their indispensable function in molding inclusive design methodologies. By means of examining captivating case studies and cooperative endeavors, the workshop seeks to stimulate a group transformation towards a future that is more inclusive and easily accessible.

This session's main goal is to explore complex ways to go beyond conventional limits in order to further the cause of global inclusiveness. Underscoring the importance of adopting a holistic strategy, the talks will cover a wide range of subjects, including digital interfaces, product design, and architectural factors. The session urges a shift away from retrofitting solutions and toward a proactive and inclusive approach, advocating for the integration of accessibility principles at the very beginning of design processes. Our sessions aim is to foster an environment where inclusivity is not an afterthought, but a fundamental aspect of the design process.

CHAIRS

Chro Hama Radha - Technical College of Engineering - City Planning Department, Sulaimani Polytechnic University, Sulaymaniyah, Iraq.

Chro Ali Hama Radha has a Ph.D. in Architecture Eng.
